404 MCS/GWST	15	- LCD Monitor - Conference Table
526 CAHSS (request via online form)	20	- LCD Monitor - Smaller Tables configured into conference table
558 GLBL/ASIA	20	- LCD Monitor - Conference table
559 AMST/AFST	20	- LCD Monitor - Conference table

Notes:

Interactive Projector works like a "regular" projector as far as connecting a computer or other device for classroom presentations, videos etc. It has additional capabilities such as being cable to control the computer from the board, being able to "write" on your presentation with your finger or a pen, and being able to save what you write as a pdf to send to your class later. Furthermore, the projectors can operate wirelessly, allowing students to send their screen to the projector (with instructor control). DOIT will be providing training on this equipment.

LCD monitors in the conference rooms are 80 inches. A control box in the corner contains a Blue Ray player and computer connections. Similarly, there is a cable in the center of the conference table to which a computer or other device may be connected.
